

Radiographic Testing II

Provider: Alaska Technical

Length: 40 Hours

Cost: \$1,000

Cost Unit: Cost of the entire program

Website

http://www.alaskatechonline.com/course_descriptions.html

This course is designed for manufacturers, service organizations and overhaul agencies who require their technicians or engineers to be trained in the application of radiographic techniques. The course covers both X and Gamma Radiography with an approximately equal balance of theory and practical sessions. As well as working through their own supervised practical exercises, students will receive full instruction on darkroom procedures and radiographic interpretation.
